

# Archive to DEVONthink Pro

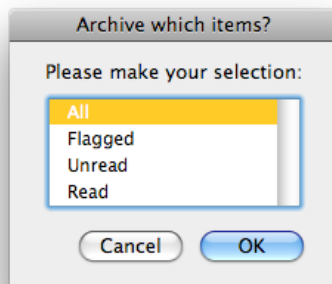

This script archives items from the selected subscription in NetNewsWire to DEVONthink Pro.

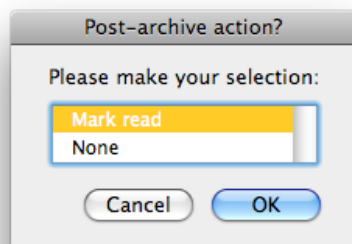

## Usage

Having installed the script (described in the next section), select the subscription, folder, or smart folder you would like to archive. Invoke the script.

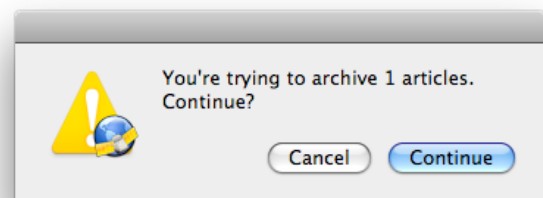

1. Choose whether to archive all items in the selected subscription, or just items that are Flagged, Unread, or Read:

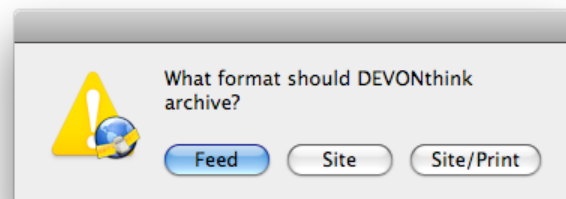

2. If you choose Flagged or Unread items, the script will ask whether you want mark the items as unflagged/unread when they've been archived.

3. The script will confirm what it's about to do:

4. Choose whether to archive the feed items directly ("Feed"), the website the feed items point to ("Site"), or printer-friendly links from the sites, if available ("Site/Print")

That's it. NetNewsWire and DEVONthink Pro will whir away in the background (though DEVONthink will not be easily usable during this time).

IN NO EVENT SHALL THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

## Installation

- ➡ Copy the script to:

`~/Library/Application Support/NetNewsWire/Scripts`

(You may need to create these folders first. The “~” represents your home folder.)

- ➡ If you haven’t already added the Scripts menu to your menu bar, add it now:
  - ▶ Open the AppleScript Utility (located in `/Applications/AppleScript`) and select the “Show Script Menu in menu bar” checkbox. The Script menu should appear on the right side of the menu bar.

## Tips

### [Batch import flagged items](#)

While perusing NetNewsWire, flag any items of interest. Then, select the “Flagged Items” smart list and run this script. Make sure post-archive action is set to un-flag the items.

### [One selection only](#)

The script can handle one subscription (or folder, or smart subscription) at a time.

### [Not-a-bot](#)

The optional time delay inserted between articles will help you stay on the good side of websites that don’t like bots.

### [Make sure DEVONthink is open](#)

...with an available database. Otherwise NetNewsWire will hang until the AppleScript timeout.
